

# STRATOS S200 Series S200-X22TQ

2-Socket General Purpose  
2U Server

# Quanta

Quanta STRATOS S200-X22TQ is a 2-socket general purpose 2U server, supporting two Intel® Xeon® processor E5-2400 family and twelve DDR3 DIMM slots. It is designed with optimized cost suitable for fast growing small and medium businesses who need more performance head rooms to scale up from 1-socket platforms.

#### Upgrade Computing Power for Fast Growing Business

The STRATOS S200-X22TQ is a 2-socket rackmount 2U server powered by up to two 8-core Intel® Xeon® processor E5-2400 product family. With up to 384GB memory and 16 hard drives, the system is an ideal general purpose or storage server for fast growing small and medium businesses. When install with one processor, the S200-X22TQ has 1.5 times performance increase compared with Intel® Xeon® E3-1200 1-socket servers; with full configuration of two processors, it boosts the performance by 3 times. The S200-X22TQ is definitely a smart investment to help you manage your business better today and prepare for quick business expansion tomorrow.

#### High Storage Flexibility

Quanta STRATOS S200-X22TQ amazingly supports up to 16 hard drives and provides many storage combinations in a 2U chassis. Choices include twelve 2.5" or 3.5" SAS/SATA hot-plug hard drives in the front side, two 2.5" hot-plug SSD drives in the rear side, and two extra internal 3.5" SATA hard drives. In addition, the S200-X22TQ also offers an optional USB flash module for OS installation. Customers could choose different levels of storage from 3Gb/6Gb SATA/SAS, or enterprise SSD drives to create optimal storage solutions for different business applications.

#### Enhanced I/O and Networking Ability

The STRATOS S200-X22TQ has great I/O scalability to meet small and medium businesses' diverse applications, providing plenty of room to grow. It offers two onboard GbE RJ45 ports; expansion options include onboard Intel® SAS/RAID upgrade ROM, one standard PCIe x8 slot, and two dedicated mezzanine slots for SAS/RAID and 10GbE SFP+ adaptors. By supporting PCIe 3.0, it improves I/O bandwidth up to 2 times from previous generation. I/O latency is also dramatically reduced with Intel® integrated I/O technology, which helps datacenters to eliminate data bottlenecks, streamline operations, and increase agility.

#### Quanta, Leading Datacenter Solution Provider

For years, Quanta has successfully developed and customized its advanced engineered products for enterprise datacenters, service providers, and top-tier multinational firms worldwide. Based on the rich experiences, Quanta is dedicated on development of "best Performance-per-Watt and per-Dollar" solutions to fulfill ever-growing datacenter demands for all budgets. The STRATOS S200 series servers are designed for small and medium businesses & cloud service providers with lower CAPEX, OPEX, and satisfying overall performance.
